### Interests

Distributed web services, cloud computing, smart hardwares, data mining, SNS, mobile applications, open source.

### Work Experience

#### **Development Manager, Push Button Information LTD., Nov 2013 - Jun 2015**

Push Button Information is a Canadian start-up that builds apps and websites to help people find out great deals and discounts, including online and offline shopping. I led a engineering team in China to develop and maintain web services and web front-end for the company. In this job, I grow up a lot on developing and optimizing large-scale web services and managing a technical team.

#### **Web Architect / Core Full-Stack Developer, EXFE Holdings, Sep 2011 - Nov 2013**

EXFE is a start-up that builds a group utility for gathering and hangout. I was responsible for leading a small team working on the web framework, server-side API (for both website and mobile app client) and web front-end. I designed the entire back-end framework and finished all the server-side codes as the first employee of this start-up. In this job, I started to build my own leadership to manage a development team, not just code alone. And I learned lots of things about how to build a start-up project, run a small company.

#### **PHP Engineer, Safirst Technology Co., Ltd, March 2010 - Sep 2011**

Our team developed an enterprise management application. This system is designed as a SaaS project. I was responsible for development of a distributed PHP MVC framework which my workmates built apps on top of it.

In additional I implemented some more features, for example:

- Enterprise workflow engine with online workflow editor based on SVG and JavaScript.
- Enterprise datacenter with version control.
- Distributed file management system with version control.

## **Web Engineer, WebOrigin Ltd New Zealand, Oct 2008 - March 2010**

WebOrigin is a website building company. My major contributions included two projects. One is WebOrigin CMS another is WebOrigin Store:

- WebOrigin CMS is a simple CMS suitable for small and medium businesses.
- WebOrigin Store is an online selling system where transactions are conducted through PayPal.

## **Other Experiences**

- Graphic & Web Design, LiDan Advertising And Media Co., Ltd  
Jul 2008 - Oct 2008
- Graphic & Web Design, Qingyuan Cable TV Co., Ltd  
Jul 2007 - Aug 2007, Internship
- Founder of H3O Networks(a graphic & web design studio)  
Jun 2004 - Sep 2005

## **Education**

- Bachelor of E-Commerce, South China Normal University, China, Sep 2005 - Jun 08  
Graduation Project: Built a city public transport query system with GIS information.
- International Accounting, South China Normal University, China, Sep 2003 - Jun 04

## **English**

Have good communication ability of English speaking and coordination. Can read and write technical documents in English. Proficient in IT-related English vocabulary.

## **Technology**

- **Main Languages:** C, Python, Node / JavaScript, Swift, PHP, Pascal, .Net
- **Limited Languages:** Objective-C, Ruby, Lua, Common Lisp, C++
- **Platforms:** UNIX / BSD / OS X, Linux, Windows
- **Database:** Redis, MongoDB, Memcache, MySQL, SQLite, SQLServer
- **Graphic / Design / Multimedia NLE:** Adobe Create Suite, Apple Final Cut Studio

Comprehensive and deep understanding of IT industry, specially modern web applications and mobile computing field. Have some ideas about creating mobile apps and SNS apps. Can independently design and implement an idea. Can integrate various technology and knowledge to solve practical problems.

## **Personality**

A geek, love creating things.

As a potential employee, you will find me a hardworking, responsible, and honest person.

I am also an optimistic and active person who work efficiently under stress.

I am always keen on exploring new things and view this process as an effective way of learning. I am a big fan of technology because technology is about innovation.

Further, I am a good communicator and know how to establish and maintain good interpersonal relationships. These skills were developed during my life time in university where I was a co-founder of my university's Music Association.

Last but not least, I always set myself a high moral standard and behave ethically.
